WHAT IS UVC GERMICIDAL LIGHT?

UVC wavelengths are between 250 and 280 nanometers, making them germicidal – meaning they are capable of inactivating microorganisms, such as bacteria, viruses and protozoa.

HOW DOES UVC LIGHT WORK ?

The high energy from short wavelength UVC light damages the DNA of bacteria and viruses thereby preventing replication and ability to infect.

OUR UVC DISINFECTION PRODUCT RANGE

All our UVC products are mercury free and hence environmental friendly. Our products have been tested to be effective in disinfecting 99.9% bacteria such as E. Coli and Staphylococcus.

PRESENTING A WALLET
THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

SANTHOME
SECURITY FOR YOU

How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Freqency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor(UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56- 4%) of UV radiation that falls on the surface of the fabric to pass through it.Thus, 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.
